PROFESSIONAL SUMMARY

Full Stack Engineer with 3.5+ years of experience designing and shipping end-to-end products across React, React Native, Node.js, and FastAPI, spanning web, iOS, and Android platforms. Skilled in database design, RESTful API development, and cloud deployment on AWS, with hands-on experience integrating AI-powered features using LLMs, RAG pipelines, and LangGraph orchestration. Proven track record of improving system performance through strategic caching and query optimization, and of owning projects end-to-end from architecture through production deployment and CI/CD.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, HTML, CSS, React.js, React Native (iOS/Android), Next.js, Vite, Redux

Backend: Node.js, Python, Express.js, NestJS, FastAPI, Microservices

Databases & Caching: SQL, PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (ECS, ECR, RDS, S3, Lambda, CloudWatch, Amplify), Docker, Kubernetes, Kafka, GitHub Actions, Vercel, Jest, Unit Testing

AI & APIs: OpenAI, Claude, GitHub Copilot, ChatGPT, JWT Authentication, OAuth2, Rate Limiting, Third-party API Integration

EXPERIENCE

Biz4Group LLC — Senior Software Developer

05/2023 – Present

- Delivered product features end-to-end across web and mobile using React, React Native, Next.js, Node.js, Express.js, and FastAPI.
- Developed FastAPI endpoints for concurrent request handling; integrated CI/CD pipelines using GitHub Actions and AWS (ECS, ECR, RDS) for automated deployments.
- Optimized queries across PostgreSQL and MongoDB through strategic indexing and Redis caching, reducing API latency by an estimated 20% and database load by 15%.

Kogincs — Full Stack Developer, Trainee

10/2022 – 05/2023

- Built MERN stack web applications, developing frontend components and backend REST APIs with database optimization, improving system performance through query and component tuning.

PROJECTS

WorthAdvisor — Financial Reporting Platform

06/2023 – Present

Tech Stack: Node.js, React, Python, MongoDB, AWS (Bedrock, CloudFront, CloudWatch)

- Shipped an end-to-end platform serving 200+ production users with multi-role access control (client, employee, admin) across web and mobile (Ionic).
- Architected a Node.js–Python bridge with LangGraph workflow orchestration and AWS Bedrock; implemented a RAG pipeline with client-scoped data isolation, optimizing MongoDB/Redis to cut query latency by an estimated 20%.

SweatJoy — Live Fitness Platform

11/2025 – 04/2026

Tech Stack: React Native, Python, Zoho CRM, In-App Purchases

- Built a React Native iOS app with Apple In-App Purchases, Google/Apple Sign-In, custom deep linking, and secure payment processing.
- Integrated a Python backend syncing signup/login data to Zoho CRM, with personalized meal tracking via local caching and real-time sync.

Route AI — Logistics Optimization Engine

02/2026 – Present

Tech Stack: React Native, FastAPI, PostgreSQL, AWS (ECS, EC2), Docker, OpenAI, Gemini 2.5 Pro

- Built an AI-driven routing platform integrating HERE Maps, Google Routes, and Gemini 2.5 Pro APIs for real-time, compliant route rendering.
- Containerized the backend with Docker on AWS ECS/EC2; integrated OpenAI for permit document parsing and dynamic route restriction computation.

EDUCATION

M.C.A. — S.S. Jain Subodh Autonomous P.G. College, Jaipur (GPA: 8.8/10)

05/2023 – 05/2025

B.C.A. — S.S. Jain Subodh Mahila Mahavidhyalaya College, Jaipur (91%, Merit in Rajasthan)

05/2019 – 05/2022

CERTIFICATIONS

OpenAI API & Prompt Engineering — Coursera

2025

JavaScript Algorithms and Data Structures — freeCodeCamp

2023

Git & GitHub Mastery — Udemy

2022
